PhPID workflow

ePI Style sheet

ePI version control

ePI Type 4

# Report back from Connectathon

- **Type 1: eLabel only**
  - SmPC, Package Leaflet, Label
  - Semi-structured narrative text (section/sub-section headings, paragraphs, tables, lists, images), document info (language, date), Organization details (Company address and contact information)
- **Type 2: eLabel + product details**
  - Type 1 + structured product details (full name, class, dose form, strength, packaging, ingredients, manufactured form and administrable form)
- **Type 3: eLabel + product details + clinical details**
  - Type 1 + Type 2 + structured clinical details (Encoded indication, contraindication, interaction, warnings and precautions)

# HL7 FHIR ePI Specification introduction

- FHIR ePIs are made up of the following thirteen resources

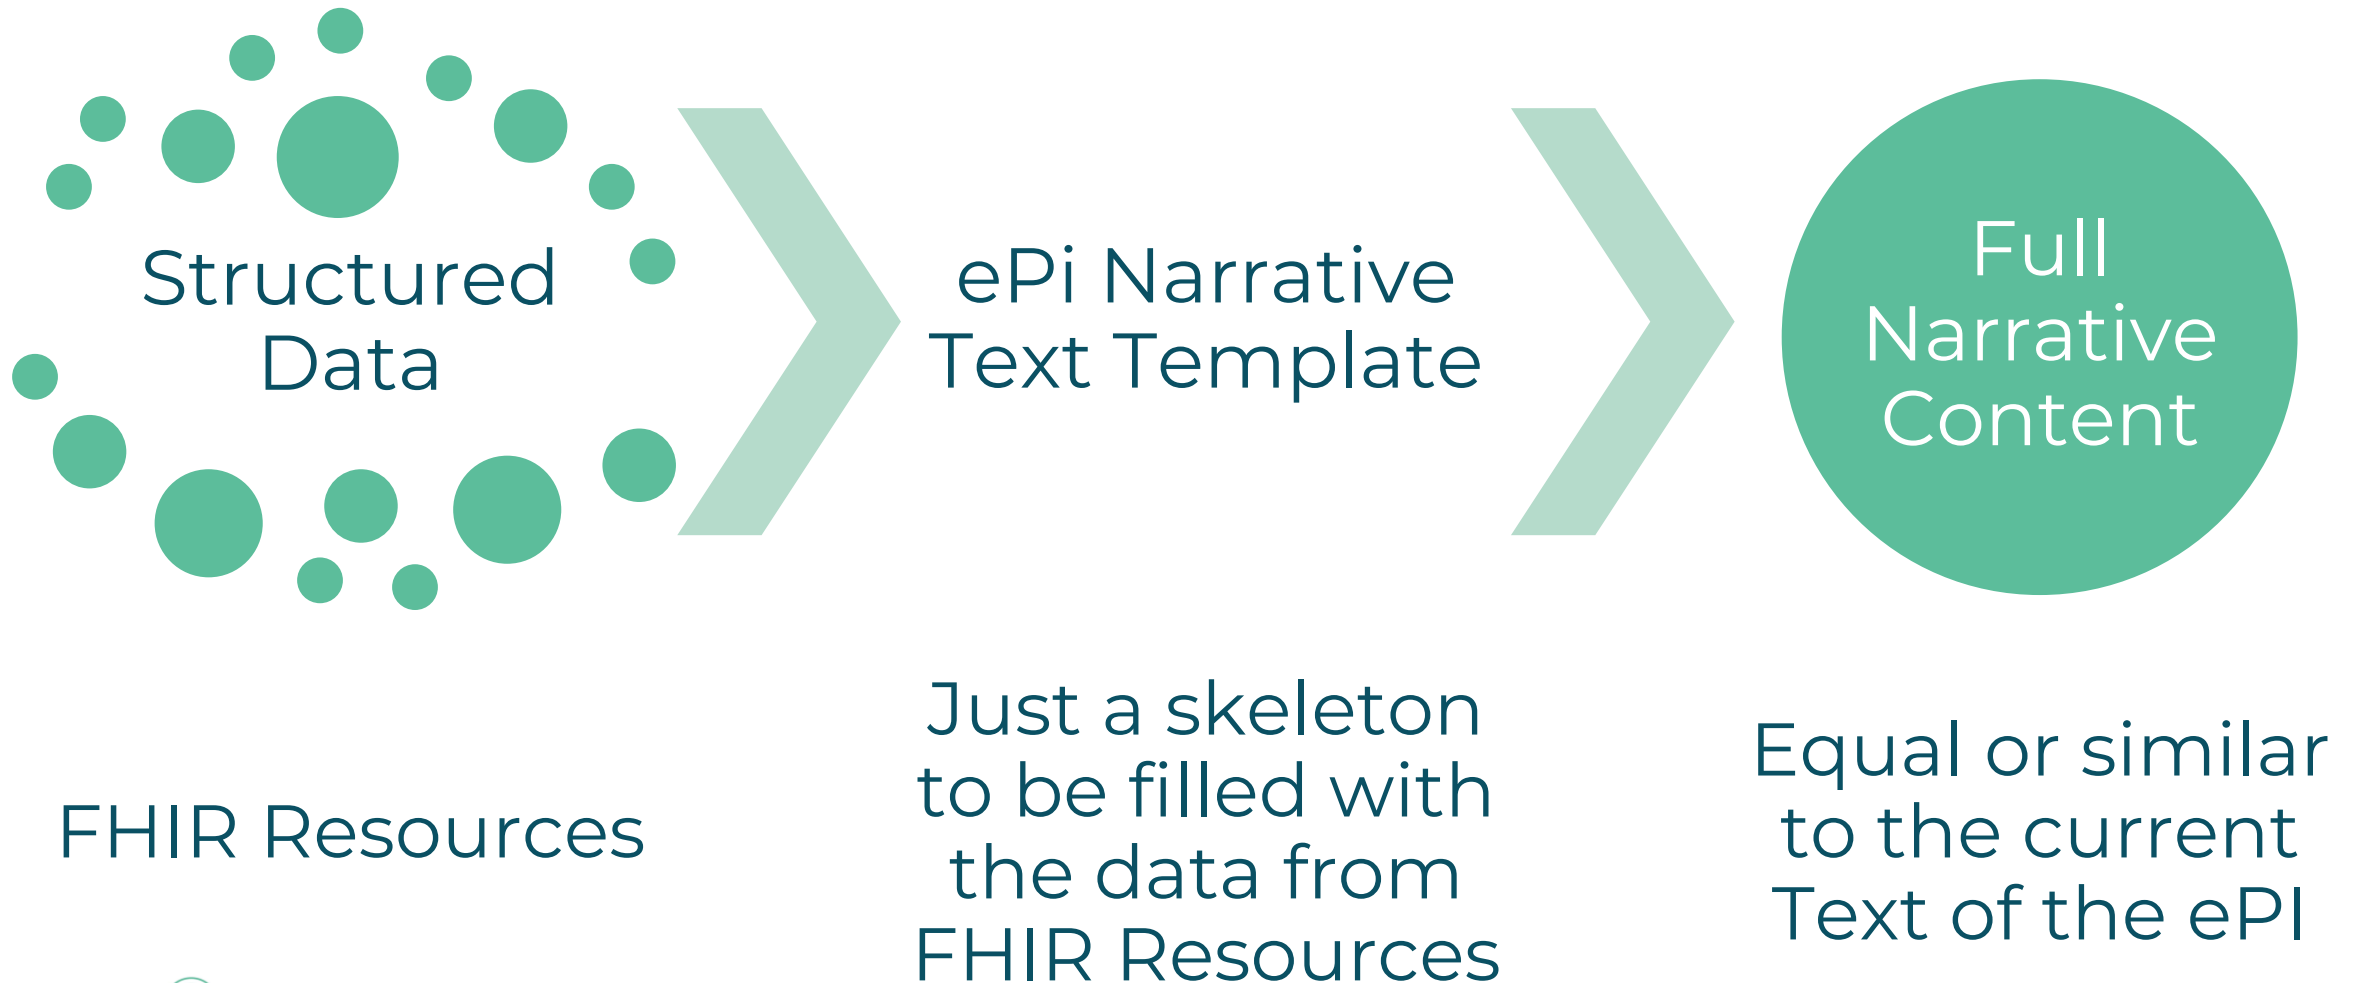

FHIR Resource Names		Description
1	List	Index for tracking all documents, versions, and translations for a product.
2	Bundle	Container that combines resources into a document.
3	Composition	For section and sub-section headings; and semi-structured narrative text (e.g., paragraphs, tables, bulleted lists).
4	Binary	For images and multimedia.
5	Organization	Defines the market authorization holder and manufacturer.
6	RegulatedAuthorization	Defines the product's authorization issued by a regulatory authority.
7	MedicinalProductDefinition	Defines the authorized product.
8	PackagedProductDefinition	Defines the products packaging.
9	AdministrableProductDefinition	Defines the product in the final form before administration to the patient (e.g., after mixing of components).
10	ManufacturedItemDefinition	Defines the product as contained in its authorized packaging.
11	Ingredient	Defines the ingredients that make up the medicinal product
12	ClinicalUseDefinition	Defines the indication, contraindication, interactions, and warnings
13	Substance	Details about an ingredient (e.g., chemical structure, molecular weight).

## Report back from Connectathon

- What about type 4?

The difference between the type 3 and 4 could be the linking of the content in structured format and the actual concepts.

# Report back from Connectathon

ePI Section	Resource(s) to be used to contain information
1.1 SmPC-NAME OF THE MEDICINAL PRODUCT	MedicinalProductDefinition
1.2 SmPC-QUALITATIVE AND QUANTITATIVE COMPOSITION	Ingredient (active principle)
1.3 SmPC-PHARMACEUTICAL FORM	MedicinalProductDefinition
1.4.1 SmPC-CLINICAL PARTICULARS-Therapeutic indications	ClinicalUseDefinition/MedicinalProductDefinition
1.4.2 SmPC-CLINICAL PARTICULARS-Posology and method of administration	MedicationKnowledge (posology) MedicinalProductDefinition (method of administration)
1.4.3 SmPC-CLINICAL PARTICULARS-Contraindications	ClinicalUseDefinition.where(type=contraindication)
1.4.4 SmPC-CLINICAL PARTICULARS-Special warnings and precautions for use	ClinicalUseDefinition.where(type=warning)
1.4.5 SmPC-CLINICAL PARTICULARS-Interaction with other medicinal products and other forms of interaction	ClinicalUseDefinition.where(type=interaction)

13	Substance	Details about an ingredient (e.g., chemical structure, molecular weight).
14	Medication	Data about dosage / usage

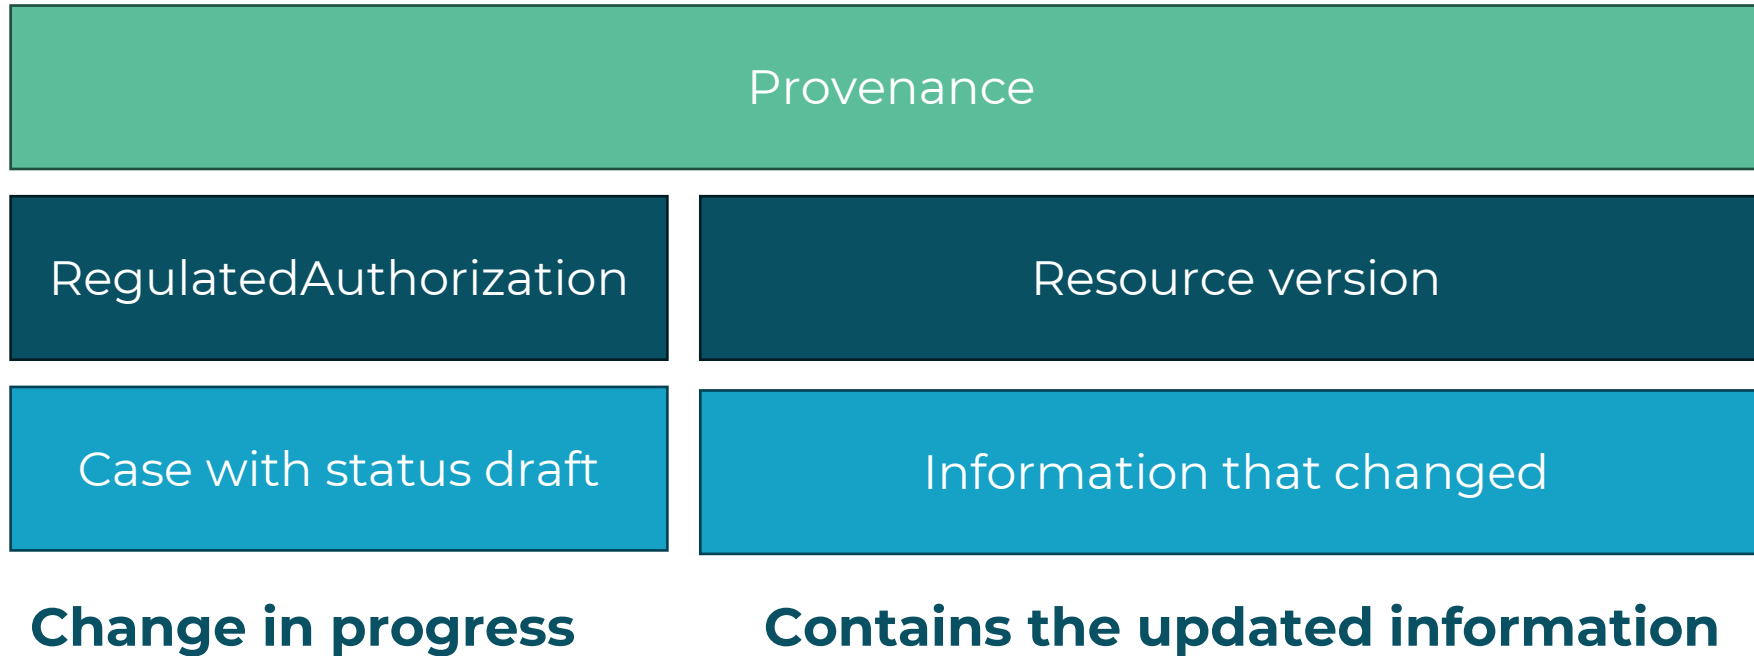

# Report back from Connectathon

How to  
handle  
variations

## Report back from Connectathon

- Be able to map cases and content changed with it
- Build the narrative Text taking into account the current approved, or with draft changed and be able to highlight them as draft/in progress
- Create more automation with submission of ePIs

# Report back from Connectathon

Provenance

RegulatedAuthorization

Resource version

Case with status draft

Information that changed

Change in progress

Contains the updated information

 case	Σ	0..1	BackboneElement	The case or regulatory procedure for granting or amending a regulated authorization. Note: This area is subject to ongoing review and the workgroup is seeking implementer feedback on its use (see link at bottom of page)
 identifier	Σ	0..1	Identifier	Identifier by which this case can be referenced
 type	Σ	0..1	CodeableConcept	The defining type of case Binding: <a href="#">Regulated Authorization Case Type (Example)</a>
 status	Σ	0..1	CodeableConcept	The status associated with the case Binding: <a href="#">PublicationStatus (Preferred)</a>
 date[x]	Σ	0..1		Relevant date for this case
 datePeriod			Period	
 dateDateTime			dateTime	
 application	Σ	0..*	see case	Applications submitted to obtain a regulated authorization. Steps within the longer running case or procedure

## Data

### ePI

Information about medicines

### IPS

Information about patient

### RMM

Additional Information

**“lenses”**  
or clinical  
knowledge  
programmatically  
defined

Personalized ePI

**OR**

“Focused” ePI

# Gravitate and go beyond the ePI

Focused Leaflet

What Dovato is and what it is used for

A film coated tablet that is white and oval shaped with "SV 137" on one side. Dovato is a combination tablet of two drugs:

1. Dolutegravir which belongs to a group of anti-HIV drugs called integrase inhibitors.
2. Lamivudine which belongs to a group of anti-HIV drugs called [nucleotide/nucleoside](#) reverse transcriptase inhibitors (NRTIs) or 'nukes'. The two drugs are used in combination for the treatment of HIV. Please speak to your clinic doctor or pharmacist if you would like more information about how these drugs work.

The recommended dose of Dovato is one

Tablet
